Ms. Williams is a follow up for total hip arthroplasty and she is doing very well. The wound looks excellent. X-rays look perfect. At this point we will stop the Coumadin. She is on a cane. She can start driving. I will see her in the clinic in six weeks. JPD/ca

1/21/05 (JPD) Mr. Williams called requesting a note faxed to 677-8809 stating the date of her surgery so she could get her month back for her weight program. Approved per JPD. Note faxed. M. [unclear]

Ms. Williams' hip is doing very well. She has minimal antalgic gait and she is only less than two months from surgery so I think she is really doing very well. More than anything reassurance that she will get completely better. I will see her in the clinic in six weeks unless problems arise. JPD/ca
